1. Styling React Components

React Components can be styled in different ways:

- Using CSS
- CSS-in-JS
- SASS & SCSS
  - many more...

1.1 Using CSS

Writing CSS in external CSS files for each component and passing class name as a value to the **className** attribute.

File: src/App.js

```jsx
1   import "./App.css";
2
3   const App = () => <h1 className="heading">Hello World</h1>;
4
5   export default App;
```

File: src/App.css

```jsx
1   .heading {
2     color: #0070c1;
3     font-family: 'Roboto';
4   }
```

1.2 CSS-in-JS

CSS-in-JS is a styling technique where JavaScript is used to style React Components. It can be implemented using the below third party packages.

- Styled Components
- Emotion
- Radium many more...
